BUYER'S ELECTION OF INSPECTIONS FOR VACANT LAND

This is a form created by the San Diego Association of REALTORS® and as such is not covered by C.A.R. User Protection Agreement. This form is intended for use primarily in the San Diego County areas for vacant land transactions. Property Assessor Parcel Number(s): Property Address: Accepting the condition of the property within the contractual time limitations is a contingency of the Vacant Land Purchase Agreement. Buyer has the right, and is encouraged by Broker(s)/Agent(s) (hereafter referred to as Broker), to fully evaluate the property in order to ascertain that it is satisfactory to Buyer. Broker is not qualified to evaluate the condition of the property nor its related intended uses. Broker will not verify information made from others, including inspection reports. All inspections and evaluations should be conducted by qualified contractors, engineers or other experts. Buyer should review all inspections and reports with the person who conducted the inspection. Buyer is encouraged to consider having the following types of inspections of the property. This inspection list does not include all possible types of inspections. Buyer is electing, at his/her cost, to have inspections performed as initialed below and agrees to return the property to its pre-inspected condition. Buyer is responsible for arranging inspections within the time frames specified in the Vacant Land Purchase Agreement. **INITIALS** EACH ITEM MUST BE INITIALED "YES" OR "NO" TO INDICATE AN ELECTION BY BUYER. By initialing "No," Buyer is NOT waiving the right to such an inspection. Provided that contractual time limitations are followed, Buyer may later elect to conduct inspections which are initialed "No." **SOILS EVALUATION.** This inspection is typically conducted by a civil or geotechnical engineer Yes to evaluate soils suitability, grading, drainage and other soils matters. ZONING AND OTHER LAND USE REGULATIONS. The existing use of the property, or the anticipated use by Buyer, may not be in compliance with existing zoning designations, set-backs, Yes No or other land use regulations. Unless otherwise stated in writing, Broker has no knowledge as to the status of current or future zoning regulations, land use restrictions, or suitability for improvements for further development in connection with this property. Broker has no knowledge of any future development in the surrounding areas. Broker is not qualified to, and will not, obtain, review, or evaluate permits, zoning designations or land use regulations. Buyer, or qualified service retained by Buyer, is advised to check with appropriate governmental agencies to satisfy his/her concerns about zoning regulations and other land use considerations. LOT SIZE, BOUNDARIES, EASEMENTS AND ENCROACHMENTS. Broker has not verified lot size, boundaries, easements or encroachments. This evaluation is performed by a land sur-Yes No veyor or civil engineer in conjunction with title records to accurately verify the true property lines and accurately identify easement locations. Fences, walkways and other improvements may not correspond with property lines reveal easements or other restrictions to the property. Even if all easements are plotted, preliminary reports from a title insurance company may not provide adequate information on these items. Buyer acknowledges receipt of copy of this page, which constitutes Page 1 of 4 pages.

NO REPRESENTATION IS MADE AS TO THE LEGAL VALIDITY OR ADEQUACY OF ANY PROVISION IN ANY SPECIFIC TRANSACTION.

BUYER'S ELECTION OF INSPECTIONS FOR VACANT LAND (BEIVL Page 1 of 4)

		(Please initial at "Yes" or "No" for each item.)	
/// /es No	_ 4.	WATER SUPPLY INSPECTION. Property within a water district (private or public) may or not be serviceable by the designated water company. The availability and cost to hook up to a company is typically conducted by the water company's engineering department. Broker remends that any property that may be serviceable by a water company be verified by a qualified dividual. Properties that are serviced by private water well and pumping system (either on the property or through a private water company) may require the property owner to maintain the systems. Buyer should verify that such a system has adequate water flow and is unaffected by ter table conditions, contamination from chemicals or bacteria. This inspection is typically ducted by a qualified individual to evaluate the operation, condition, and serviceability of the tem, including the evaluation of potability and possible contamination. Broker recommends any property serviced by a well be inspected by a pump contractor, well driller and/or other of fied individual.	
/es No	5.	SEWER AND SEPTIC INSPECTION. Buyer is advised to contact the appropriate governmental agency to verify that the property is able to connect to a sewer or septic system for waste disposal Not all properties within a sewer district are able to connect to sewer without substantial costs or requirements. Some soils may not be suitable to pass a percolation ("perc") test, may need an updated perc test, may require a septic layout even though a perc test has been approved, may need five or more years of monitoring during average rainfall years to be approved for a septic system. There are costs and fees to evaluate the property for, and install a septic system including but no limited to storage tanks, length of leach field, type of system, type of perc test, tight lining, blanke perc tests and approved perc tests with layout. Perc tests can expire and may need updating. This inspection is typically conducted by a general engineering contractor, civil engineer and/or anothe qualified individual. Broker recommends that any property that has a potential to be serviced by	
// /es No	6.	sewer or septic system be evaluated by a qualified individual. AVAILABILITY OF UTILITIES. Vacant land may not have utility easements or the available power, telephone, cable, natural gas and other utilities. Buyer, or qualified service person retained by Buyer, is advised to check with the appropriate governmental/utility agency to satisfy his/her concerns about cost and availability of utilities.	
/es No	7.	ENVIRONMENTAL SURVEY. Certain properties may be at a "high risk" for the presence of oil, gas, or other pollutants in the soil. Storage facilities, tanks or spills may contaminate the subject property or adjoining properties. This inspection is conducted by a specialist in environmental chemicals who evaluates and reports on those conditions typically in tiered reports. Certain properties are at "high risk" for the presence of endangered/protected species (both fauna & flora). San Diego has a variety of species that are protected and are not allowed to be disturbed. Some properties/species have restrictions as to grading, use, notification and monitoring requirements. Before development, properties which have endangered or protected species may require the purchase off site mitigation land prior to development. Buyer is advised to obtain an environmental survey by a qualified professional.	
es No	8.	NATURAL HAZARDS DISCLOSURE REPORTS. Certain hazard zones disclosures are mandated by federal, state and local laws. The companies that provide these disclosure reports ofte have additional reports available for an extra cost. Such additional reports include local geological hazards; building permits; sewer and septic tank permits; environmental risks; violations on record; zoning designations; proximity to airports, railways, freeways, and high tension power lines Buyers are advised to consult with a zone disclosure company for additional reports available and costs.
